NURNP 2116 NURSING PRINCIPLES & PROCEDURES II

Date: 21.12.2021

Time: 3 hours

ANSWER ALL SIX QUESTIONS

1. A 28 year old male admitted to medical ward with the history of fever for three days. He looks anxious, since he never hospitalized before. Consider yourself as a nurse working in that ward and you were assigned to admit this patient.
 - 1.1. List the situations in the ward setup which may generally cause the fear to the patient. (30 Marks)
 - 1.2. List the details which you need to record in the admission book. (20 Marks)
 - 1.3. Briefly explain the preliminary assessments that should be made by you while admitting this patient to the ward. (40 Marks)
 - 1.4. List the forms needed to add to the admission form to prepare the Bed Head Ticket (BHT). (10 Marks)

2.
 - 2.1. Briefly describe the responsibilities of a nurse on the following:
 - 2.1.1. Advice the male patient to collect the mid-stream urine sample for culture. (25 Marks)
 - 2.1.2. Collection and transport of blood culture sample. (30 Marks)
 - 2.2. Write note on "blood collection tubes". (25 Marks)
 - 2.3. Discuss the consequences of improper collection and transport of specimens. (20 Marks)

3.
 - 3.1. List the indications for oxygen therapy. (20 Marks)
 - 3.2. Briefly describe the factors affecting oxygenation. (30 Marks)
 - 3.3. Write five (5) possible nursing diagnosis for a patient with respiratory problems. (25 Marks)
 - 3.4. Briefly explain the responsibilities of a nurse on nebulization therapy. (25 Marks)

4.
 - 4.1. List the effects of applying heat to the body as a therapeutic measure. (20 Marks)
 - 4.2. List five (5) hot application methods. (10 Marks)
 - 4.3. Briefly explain any two hot application methods mention in 4.2. (30 Marks)
 - 4.4. List five (5) cold application methods. (10 Marks)
 - 4.5. Briefly explain any two cold application methods mention in 4.4. (30 Marks)

5.
 - 5.1. Define “enteral feeding”. (10 Marks)
 - 5.2. List the indications and contra indications of naso-gastric tube feeding. (40 Marks)
 - 5.3. Briefly explain the responsibilities of a nurse when caring the patient with naso-gastric tube. (50 Marks)

6.
 - 6.1. List the components of a complete medication order or prescription. (20 Marks)
 - 6.2. List the sites used for intra muscular injection. (20 Marks)
 - 6.3. Briefly explain the responsibilities of a nurse on intra venous medication administration. (40 Marks)
 - 6.4. List the common complications that may occur when giving an intravenous infusion. (20 Marks)
